SUMMARY

28 years old who loves Web-Development.
Lived in Norway from 1999 til 2006, been in Lebanon since then.
I like being around like minded people, and learn from them.

EXPERIENCE

Web-Developer, Cloudappers

beirut— 2012-2015

I worked on pretty much everything from Front-end to Back-end, and developing API for mobile applications.

Web-Developer, Freelance

2015-current

Accomplishments (while at company and as a freelancer, sorted from newest to oldest)

- [Educationwallets Website](#) E-Commerce selling school products and books. (Django, and some React on the front-end)
- [Educationwallets IOS/Android app API](#) back-end API using Django-REST framework
- [zamamir.com](#) News sharing website. (back-end, front-end. Using Django-REST framework and React)
- [narratics.com](#) Writing and sharing hypothetical stories. (front-end, back-end. Django)
- [manaihege.com](#) A website for a school. (front-end, back-end. Django)
- [tomandserg.com](#) did server administration and minor back-end work.
- [dropbox.com/sh/zo6intf5d6u9v4q/AADEg8kXqY9YrexIQTx0WNI3a?dl=0](#) did back-end API for an text based IOS game. (Back-end API. Django and Tastypie)
- <https://www.dropbox.com/sh/us3rkcl8cql7hk6/AACwjjibRJ4xglPKNgukCWOia?dl=0>, promotional facebook app for yoghurt company that lasted a couple of weeks. (back-end, front-end)
- [facebook.com/beitmisk/app_575970922475042](#) Small question based facebook application for a large real estate company. (front-end, backend.)
- [dreamworks-spa.herokuapp.com](#) A previous website version for spa center. Client updated website since then. (front-end, back-end)
- [almoallimgroup.com](#) Website for a Fasion, jewelery and watches store. (back-end. Django)
- <https://www.dropbox.com/sh/saaomlz1cym5b6i/AACwP8c2vCTwQNzb2u17miTha?dl=0> Older project for Coca-Cola Midle-east. A user uploads an image and gets to see it displayed on a 3D bottle. it was never released because of business agreements with company and Coca Cola. (front-end, back-end)

EDUCATION

Self-taught

— 2011-current (always learning)

Started hacking with javascript, html and css at codeacademy, before moving to python, first through an online course made by google, and then on to udacity.com took an intermediate web-development course made by founder of reddit. Been doing various courses since then.

After that i have worked at company for 3 years. And freelancing since 2015.

SKILLS

- Back-end as well as Front-end developer
- Python (intermediate/advanced, 4 years)
- Django (almost all projects done are in Django)
- Flask (used it for a few personal projects)
- I always write tests.
- HTML, CSS and Javascript
- Current favorite stack is SASS, ReactJS (Loving it so far), ES6 (using babel) and jQuery (for DOM Manipulation).
- nginx, gunicorn, apache
- PostgreSQL
- Django-Rest-Framework
- Tastypie
- Celery (mostly for email queue)
- Linux (Ubuntu)
- Redis (caching and all sort of small stuff)
- Git
- Heroku, AWS
- Learn and use whatever necessary :)
